**DETAILED ACTION**

***Status of Claims***

1. Claims 9-14 and 21-27 are pending.  
Claims 1-8 and 15-20 are canceled.  
Claims 9-14 and 21-27 are provisionally rejected

***Election/Restrictions***

2. Applicant's election with traverse of Group I in the reply filed on October 30, 2006 is acknowledged. The traversal is on the ground(s) that the inventions are related and have unity of invention. This is found persuasive thus the previous restriction requirement is withdrawn.

***Priority***

3. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

***Information Disclosure Statement***

4. The information disclosure statement filed January 29, 2004 has been considered.

***Oath/Declaration***

5. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

This application presents a claim for subject matter not originally claimed or embraced in the statement of the invention. The last four lines of claim 21 and the method of claim 22 are not supported in the specification. A supplemental oath or declaration is required under 37 CFR 1.67. The new oath or

Art Unit: 1621

declaration must properly identify the application of which it is to form a part, preferably by application number and filing date in the body of the oath or declaration. See MPEP §§ 602.01 and 602.02.

### **Specification**

6. The disclosure is objected to because of the following informalities: the specification contains typos, for example the word "by" on page 13, line 18 should be changed to "be".

Appropriate correction is required.

### **Claim Rejections - 35 USC § 112**

7. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

8. Claims 21 and 22 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The last four lines of claim 21 and the method of claim 22 are not supported in the specification. It is noted that claims 21 and 22 were added in a preliminary amendment, filed January 29, 2004. However, since the original oath does not reference this amendment, the preliminary amendment is not considered to be a part of the original disclosure. See insert below taken directly from the MPEP:

*For applications filed before September 21, 2004, a preliminary amendment that is present on the filing date of the application is part of the original disclosure of the application if the preliminary amendment was referred to in the first executed oath or declaration under 37 CFR 1.63 filed in the application. See MPEP § 602.*

9. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1621

10. Claim 24 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

This claim is indefinite because it depends from canceled claim 17.

### ***Double Patenting***

11. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

12. Claims 9-14, 21, and 23-27 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 16-23 and 25-27 of copending Application No. 10/503,213 (US 2005/0107628 A1). Although the conflicting claims are not identical, they are not patentably distinct from each other because the olefin mixture and surfactant alcohols appear to have the same composition.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
